

Convertors®

Sharps Containment and Instrument Management

The Instranetics™ system of sharps containment and instrument management solutions from Allegiance Healthcare helps make the fundamental work in the OR safer and more efficient regardless of protocol or procedure. Whether it's Custom Sterile™ packs, Convertors® standard packs or single sterile components, the Instranetics™ line of products is a name you can trust.

SECURE LOCKING CLOSURE:

Simple snap closure ensures locking in a single step. This minimizes the chance of secondary lock jams or increased sharps risks due to overhandling.

BLADE REMOVAL:

Disarmer system focuses on immobilizing the blade so that only the handle is removed. Rigid design ensures blade catch for controlled release.

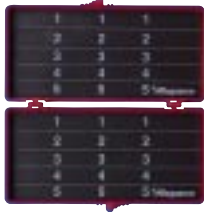

QUALITY — SIMPLICITY — EFFECTIVENESS:

Instranetics™ products offer a selection of counting systems utilizing top quality foam block, foam strip, adhesive or magnetic retention, all with an optional blade disarmer.
