

# Glove Sizing

## How to Measure for Proper Sizing

Take a measuring tape and wrap around the hand over the knuckles. Do not measure the thumb. The reading will be in inches. The number of inches around the hand will be your approximate glove size. If your hand measures  $7\frac{1}{2}$  inches, you would typically wear a size  $7\frac{1}{2}$  glove.

Hand Specific Glove Size		Ambidextrous Glove Size
$5\frac{1}{2}$	Purple	X-small
$6-6\frac{1}{2}$	Blue	Small
$7-7\frac{1}{2}$	Orange	Medium
$8-8\frac{1}{2}$	Green	Large
9	Yellow	X-large
