

Medi-Vac® Products

Tubing and Suction Handles

A market leader in clinical suction products

Medi-Vac® products offer a comprehensive line of sterile suction tubing and handles to meet your needs.

Our wide variety of sizes and features support economy through standardization while maintaining quality and flexibility.

Medi-Vac® Suction Tubing

Medi-Vac® sterile suction tubing is a cost-effective solution with the quality and reliability you need to remove fluids from the surgical field.

Special formulation

Provides easy handling and drapability with low coil memory

Thick tubing walls

Offer safety and collapse-resistance at high vacuum pressures

Maxi-Grip™ connectors

Patented connectors provide a secure fit on a wide range of surgical instruments and equipment

Available in a variety of formats

- Convenient precut sterile lengths
- Economical, nonsterile 100' rolls
- Standard and custom Medi-Vac canister kits
- **Presource™** procedure packs and **Presource** PBDS modules

Canister kits save time and money

Medi-Vac preassembled canister kits are the convenient and cost-effective solution for all your suction needs. With canister kits, all items used in the suction process, including canisters, tubing and handles are packaged as a single system. Medi-Vac preassembled kits save time and money by simplifying purchasing, inventory and setup procedures.

For more information contact your Cardinal Health sales representative or call 1.800.964.5227.

Bulk Nonsterile Rolls

Tubing is available in 100' rolls with Maxi-Grip™ connectors at 6' intervals for length customization. A convenient packaging dispenser is provided for easy transport and use.

Cat. Nos. N5100, N6100, N7100

Tube Holding Device

Multipurpose, adhesive-backed holding device is for use with suction tubing or electrical cords. Device allows the tube to slide or secures the tube in a stationary position.

Cat. No. K99

Large-Bore Suction Tubing

Large-bore $\frac{3}{8}$ " I.D. maximizes flow and drainage capacity. Thick tubing walls offer safety and collapse resistance.

Cat. No. N1010

Maxi-Grip Connector

Tubing is equipped with Maxi-Grip connectors to accommodate a wide range of surgical instruments and equipment with a secure fit.

Male Connector

In addition to the Maxi-Grip connector, every sterile tube includes a rigid male connector for coupling additional tubes.

Medi-Vac® Suction Handles

Medi-Vac® suction handles deliver performance and maneuverability. These lightweight handles are designed to provide optimal control and visibility with minimal tissue trauma.

Minimize trauma

Side holes minimize tissue trauma

Available in a variety of formats

- Individually packaged
- Preconnected to patient tubing for easy setup
- **Presource™** procedure packs and **Presource** PBDS modules

Tapered Bulbous Tip

Tapered flanges to reduce tissue trauma with maximum visibility. Available with or without vent.

Cat. Nos. K82, K80

Bulbous Tip

Rounded to reduce tissue trauma. Available with or without vent.

Cat. Nos. K86V, K86

Straight Tip

Open tip without unnecessary bulk for better visibility. Available with or without vent.

Cat. Nos. K87V, K87

Flexi-Clear™ Handle

Provides suction flexibility with clarity and visualization. Available in three tip styles: fine, regular and high. Vented and tubing options available with regular-capacity handle.

Cat. Nos. K60, K61, K62, K61V, K61-606, K61-612

Poole Handle

Multiposition versatility from sump action to pinpoint suctioning. Available with or without tubing.

Cat. Nos. K776, K770

Frazier Handle

Complete with obturator that allows shaping of the shaft to the desired position without occluding. Includes control vent.

Cat. Nos. K71, K72, K73

Ordering Information

All Medi-Vac® tubing and suction handle products are 100% latex-free.
