

Operating Room and Birthing Room Clean-up Packs

Presource™ Products and Services

Cardinal Health standard clean-up packs allow you to standardize supplies needed for a procedure for a more efficient operating room with faster turnovers. These products help to eliminate fluid contact with the table pad and arm boards, helping to limit the handling of potentially hazardous materials. Their nonlinting properties are another added benefit.

Everything we do helps our customers anticipate needs and stay ahead of problems before they occur. The Cardinal Health **Presource™** team is skilled at designing, delivering and adapting to meet customer needs for more than 30 years. Our standard line of nonsterile packs provides you with the greatest opportunity to control cost, improve operational efficiencies, standardize practices and componentry, stabilize patient care and streamline your supply channel. Let our **Presource™** team assess your needs and procedural practices today.
