

# PackManager® On-Line Decision Support

Patent Pending

**Presource® Procedure Pack Solutions**

*Procedure Pack  
Management...  
Simplified.*

*What you need.  
When you need it.*

*Available 24 hours a day,  
7 days a week*

Our PackManager® on-line tool provides you with easy access and visibility to all your **Presource®** procedure pack program details – from component details to pack assembly images, available anytime you need it.

This mini-guide highlights features of our PackManager® on-line tool you'll use the most:

- Pack Inventory**
- Pack Detail**
- What If**
- Savings Opportunity**
- Pack Images**
- FAQs**

### Frequently asked questions

**1 How do I register for PackManager® Program?**

Go to [www.packmanager.com](http://www.packmanager.com) and fill out the registration form. You will receive a User ID and password within 48 hours.

**2 Why can't I find all of my packs listed when I look at my pack inventory?**

You may not have the rights to view all of your facilities packs. Contact your Cardinal Health sales representative for further visibility.

**3 How do I get my User ID and password?**

Click on the link from the log on page that says "Forgot User ID/Password". Fill out the form and send it to the Help Desk, or call 1.800.323.3830.

**PackManager® User ID:** \_\_\_\_\_

**Password:** \_\_\_\_\_

# Pack Inventory

## Access what you need, when you need it

Whether you have one or multiple facilities, Pack Inventory provides you with the visibility you need to successfully stay ahead of your facility's needs. This is achieved by providing you with detailed and up-to-date information pertaining to your **Presource**® procedure pack program.

**Usage Alert** – Allows the user to see packs whose forecast is plus or minus 30% of the last month's usage or monthly planned usage

**Pack Images** – Shows step-by-step imaging of how the pack is built

**Savings Opportunity** – Shows packs clearly identified with savings opportunities and leads the user to the Savings Opportunity page, which identifies potential opportunities to reduce pack prices

**Version Compare** – Shows the difference between versions of the same pack (example: version A to B)

### **Pack Inventory provides you with:**

- Pack history and usage
- Pack descriptions and details, which include complete bill of materials
- How many packs are in the distribution center
- Additional pack information

## Pack Detail

### *The right information for the right procedure*

Pack Detail will show you each and every line item that a specific pack contains. You can do away with having to check your preference card every time you have a question about your procedure. Using PackManager® program's Pack Detail, we'll show you what you need to know about what's in your pack. With the increased awareness of latex sensitivity, you'll also be able to identify what components have latex.

 **Latex Flag** – Indicates that a component contains or may contain latex

 **Pack Images** – Shows step-by-step imaging of how the pack is built

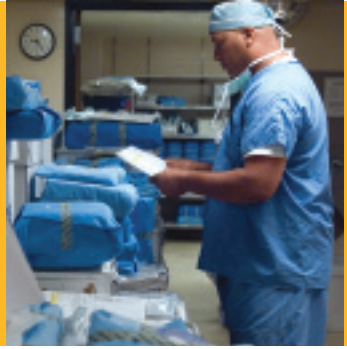

#### **>> Export Pack Detail**

Exports the Pack Detail information to an Excel® spreadsheet in the same format

#### **Pack Detail shows you:**

- Component quantity
- Component unit of measure
- Cardinal Health part number
- Latex status
- Part description
- Vendor part number
- Vendor name

# What If

## What if you could make your own changes?

Well you can! With PackManager® program's "What If" capabilities, you can make the necessary changes to your custom procedure packs right on your workstation. When you make the necessary changes, an e-mail with your requested changes is sent directly to your **Presource**® sales representative and our sales operations representative.

 **Latex Flag** – Indicates that a component contains or may contain latex

 **Pack Images** – Shows step-by-step imaging of how the pack is built

### **"What If" will allow you to:**

- Add a part using the PackManager® parts search
- Delete a component from your bill of material
- Replace the current component with a different component
- Change the quantity of the current component

## Savings Opportunities

### *A penny saved is a penny earned*

You're always under pressure to keep your costs down. PackManager's® program's Savings Opportunities helps you identify ways to lower the cost of your procedure pack. You have the flexibility to look at just one pack or see what the opportunity is for your entire facility. Once you've identified where your opportunities are, see what components are driving the most savings.

#### **Savings Opportunities show you:**

- What components have potential savings
- Which packs have savings opportunities
- Estimated end sell price after savings
- Estimated annual savings

# Pack Images

## A picture is worth a thousand words

See how your **Presource**® procedure packs are built from the ground up. Pack Images will show you a frame-by-frame slide show, where each component is placed within your pack. Pack Images are also a great way to train your new employees on how the custom packs work and how they fit within your facility. The component at the top of the list is pictured on the right.
