

Increase productivity while maintaining a high standard of patient care

Presource® Products and Services

Product portfolio

We offer an **extensive product portfolio** to ensure the right pack for the right procedure, maximizing value and minimizing waste. Our wide variety of kitting solutions meet virtually every procedural need in the operating room, catheterization and interventional radiology labs, emergency room, labor and delivery and nursing floors.

- Procedure Based Delivery System (PBDS®) modules
- Custom and standard sterile kits
- Minor procedure trays, including IV start, dressing change, suture removal and laceration
- Nonsterile kits, including OR turnover and clean-up, personal protection, anesthesia, maternity, baby care and delivery apparel

At Presource®, our solutions are tailored to your unique needs.

In addition to our extensive portfolio of more than 450 standard kits, we can customize kits to meet your specific needs.

Our supply chain management solutions help you focus on why you entered healthcare – to care for patients.

We provide an outside viewpoint to help you improve your process – everything from identifying the right components to put in your packs to streamlining your case pick process. The results are a more efficient OR supply chain and more time for quality patient care.

Logistical Reviews

Throughout our **Presource**® process and during Logistical Reviews, our experienced Logistics Managers evaluate your current supply chain workflow and identify opportunities for efficiency based on practice and process changes.

Key Benefits

- Increased productivity
- Improved space utilization
- Improved inventory management
- Decreased waste and product returns
- Improved charge capture

Clinical Reviews

Throughout our **Presource**® process and during Clinical Reviews, our experienced clinicians evaluate your current program, clinical practices and process and identify opportunities to drive efficiency.

Key Benefits

- Increased efficiencies
- Improved case pick process
- Increased product standardization
- Increased pack and product consolidation
- Improved preference card management

Preference Card Management

Delivering measurable results

Good preference card management is key to eliminating inefficiencies and managing waste. Through our preference card engagement, our experienced clinical team works with you to assess your existing preference card system and process to ensure your top surgical procedure preference cards contain accurate and consistent information.

Key Benefits

- Improved case pick process
- Reduced product waste and returns
- Improved staff satisfaction
- Improved data management and reporting capabilities
- Improved charge capture
- More time for patient care
