

# Support your safety protocols and objectives

## Presource® Products and Services

### Clinical Reviews

Throughout our **Presource®** process and during Clinical Reviews, our experienced nurse clinicians share best practices and recommend kitting solutions to promote patient and practitioner safety and infection prevention in your facility.

#### Key Benefits

- Improved patient safety
- Increased safety compliance

### PreferredChoice<sup>SM</sup> Program

The PreferredChoice<sup>SM</sup> Program contains high-quality components that are manufactured by Cardinal Health or one of our strategic supplier partners. The program provides you with an opportunity for cost savings and improved patient and practitioner safety.

Through a one-of-a-kind database, we will help you find cross references for:

- Product alternatives that help improve safety
- Clinically-acceptable component alternatives for commonly used products, which will drive economic value

#### Key Benefits

- Improved patient and practitioner safety
- Cost savings

*Our kitting solutions bring together safety components that support your safety protocols and objectives and help you promote a safe, consistent standard of care.*

We understand safety is a top priority in your facility for both your staff and patients. To assist you with your goals, we offer unique safety solutions to help you promote patient and practitioner safety and infection prevention in your facility.

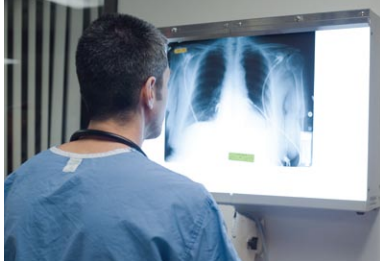

## Medication Labels

### Improve medication safety in the OR

Our medication labels for syringes, medication cups, bowls and procedural basins help you comply with JCAHO National Patient Safety Goals to prevent medication errors in the OR. These universal labels are flexible enough to meet your needs and waterproof so safety is not compromised.

#### Key Benefits

- Improved patient and practitioner safety
- Enhanced medication safety in the OR
- Compliance with JCAHO National Patient Safety Goals

## OR Sponge Management

### Aiding in the prevention of retained foreign objects

It is estimated that 3000 to 5000 cases of retained sponges occur each year. Retained sponges and towels can result in patient injury and have an approximate annual financial impact of \$1.1 billion in medical costs to the U.S.\* Through strategic partnerships, we offer leading OR sponge management technologies to help you prevent retained sponges and towels following surgery.

#### Key Benefits

- Improved patient safety

## HemCon® Bandages

### Antibacterial barrier for hemostasis

HemCon® Bandages provide a noninvasive solution to control and stop bleeding during planned diagnostic and interventional procedures. These innovative, antibacterial bandages are ideal for use in many areas of the hospital, including emergency and trauma care, catheterization and interventional radiology labs and rapid response units.

#### Key Benefits

By effectively reducing time to hemostasis, HemCon® Bandages:

- Enhance the direct pressure protocol to reduce blood loss and improve patient care
- Decrease clean-up and biohazard exposure for medical staff
- Shorten one-on-one care needs, which allows for care of additional patients

## Infection Prevention

### Stay ahead of infection

In standard and custom options, our **IV start and dressing change kits** not only create efficiencies, they help you promote a safe, consistent standard of care.

Our **central line insertion** packs for nonprocedural areas were designed by clinicians to meet the Institute for Healthcare Improvement's (IHI) recommendations for the central line bundle. In addition, central line insertion packs for procedural areas complement the practice of aseptic technique in the operating room and during interventional radiology procedures.

#### Key Benefits

- Fewer complications
- Improved outcomes
- Better clinical compliance
- Protection of staff and patients from preventable harm
